Board games in Argentina

Free summary · Edition 1.0

Free summary

The study helps choose between creation, licensing, importing, distribution, retail and access services for physical games. It compares concrete cash, rights and operating commitments, including custom manufacturing, education, corporate work and rental. It neither estimates national sales nor establishes profitability.

Three useful decisions

Stock and threshold need joint assessment: 24 units at 2933 total 70392 against a 120000 minimum; 41 exceed stock. [A01]

Blear lists unit rates, but doubling 250 to 500 almost doubles the subtotal despite a lower unit rate. Configuration and extras remain pending. [A08]

A 45000 rental guarantee is not revenue: the example retains 9000 and refunds 36000. Local delivery creates separate cash and costs. [A12]

What the full edition contains

13 applications, 5 original figures, source register and reproducible offline tool. Selective evidence without independent buyer validation. Individual ES/EN licence by VXOG SpA.
