Board games in Peru

Free summary · Edition 1.0

Free summary

Continues Peru V114 across creation, licensing, import, distribution and retail, with projects and services. Helps distinguish contents, cash and conditions before choosing; neither estimates a national market nor promises profitability.

Three useful decisions

CATAN: four declared extensions change the two-group constraint from the earlier cutoff; physical stock and compatibility remain pending. [P01–P03]

Private space: incremental second hour 100 PEN; 50 advance is not added to price again. This is not pure board-game access. [P13/P14]

Retail membership: 19.90 fee at 10% equals 199 PEN eligible spend only for purchases already intended. This does not demonstrate recurrence. [P20]

What the full edition contains

13 applications, 4 figures, source register and tested offline tool. Selective supply evidence without independent study-buyer validation. Individual ES/EN licence by VXOG SpA.
